

Jerry Johnson (7 year old with Eczema) Surprise, AZ

We started him on the Mangosteen Pericarp oil in the 1st week of May. On the left was his arms and legs when we started him on it. In the beginning we had to use very little because we had a tiny bottle of the oil. The Pericarp oil is one of the major ingredients in all of the Glimpse products. On the top right is the difference after just 2 weeks on the product.

The bottom right is after 3 weeks. This is significant because there were NO steroids creams or Cortizone creams used during this time period. Also, The Mangosteen Pericarp Oil did not burn his skin, like all lotions, creams, and medications do. Today the backs of his legs are almost completely clear, and his arms are completely clear. No ooze, no itching, and no burning.
