

May 23, 2005

Hi - My name is Evan and I'm 4 months old.

For few months or half my life, I have battled eczema on my cheeks and jaw line (see first 2 pictures below).

The Dr. prescribed a steroidal cream that my mom put on for a few weeks but it did nothing for my very itchy and sore face.

My mom thought she might share some of her Mangosteen Juice with me and since I have not been introduced to fruit, she started slowly.

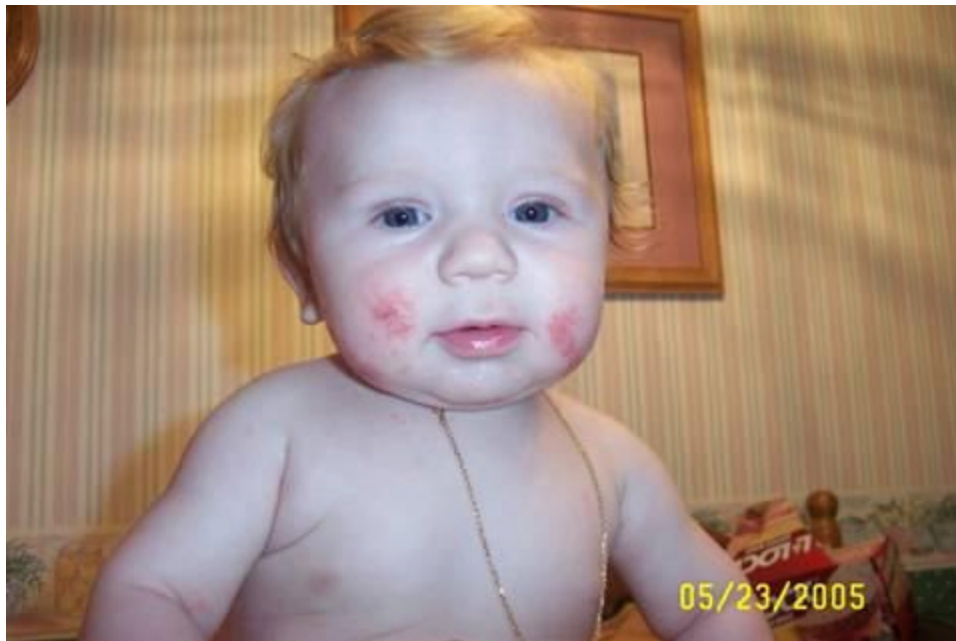

On May 23, 2005 my mom started me on 5cc (1 tsp) 3 times a day. She also rubbed some on my face with a cotton ball.

After only 3 days on Mangosteen Juice, I have had remarkable results (see pictures 3 & 4).

I could not help but want to share my results with you. If you know someone that has eczema, please share my story and pictures with them.

Thanks to Mangosteen Juice, I am a much happier little boy.

Evan

Three Days Later!!!
